

Water Resources

If your priority issues are in potable, recycled, storm, or wastewaters, **Willdan Engineering** is experienced, ready, and available to assist you. We understand the complicated nature of these issues, especially when regulatory requirements, customer needs, and competing interests are often in conflict. Timely actions are always a factor. Our technical professionals possess valuable experience working for public agencies, and they are available to provide a wide spectrum of services—from initial discussions to project design and management. Willdan Engineering has prepared the following:

- Feasibility assessments
- Urban water management plans
- Conservation plans
- Condition assessment evaluations (to reduce water losses)
- System master plans and updates
- System modeling evaluations
- Designs, specifications, and estimates
- Efficient landscape system plans
- Construction management and observation
- Water quality management plans
- Resource (asset) managing

Total Water Resources

- Water engineering—potable, recycled, storm, and wastewaters
- Financial services
- Water conservation and asset management

Willdan is experienced, ready, and available to assist you.

Financial Resources

Whether your rates or fees need a fresh review, you have special project funding needs, or you're looking for fiscal support options, **Willdan Financial Services** is ready to support your financial and technical staff with our experienced financial professionals. This approach has provided successful results for many project and agency needs. We believe each project is unique and should be customized to its specific circumstances. Our team members are experienced in the following:

- Financial and political solutions
- Rate and fee structure solutions
- Special district plans
- Proposition 218-compliant plans
- GASB 34 evaluations and plans
- Grant and loan funding applications

We are dedicated to maximizing your revenue tools and to helping you build a sustainable fiscal future.

Client
City of Lomita

Project
Cypress Street Reservoir

Services Provided
Willdan has provided project management services since 2002.

Resource Management

- Would you like the benefits of better information in order to prioritize your maintenance and capital improvement goals?
- Do you need to know what type of pipe you have, where it is located, how old it is, and its maintenance history—without extensive research?
- Would you like to quickly locate and view records, drawings, reports, and pertinent data in emergency conditions?
- Would you like to save time by not having to search through paper or electronic files of documents?

Proper management of project documents can help maximize your return on investment with prompt access to key data, including analysis of relationships between system components, land uses, rainfall, soils, population, available funding, and myriad other factors through the use of GIS mapping and tools. Our team members are experienced in helping clients make better decisions by providing them the resources to visualize the condition and performance of their infrastructure assets.

Our Strengths

Experience—Willdan has been successfully providing engineering services to hundreds of public agencies since 1964.

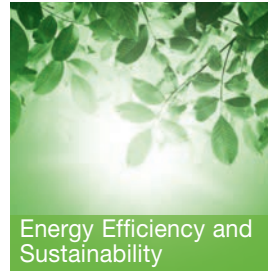

Project Managers—Our project managers have extensive experience working with public agencies, thereby allowing them to contribute unique and valuable problem-solving and technical skills to each project.

Commitment to Client Satisfaction—Our clients' satisfaction is demonstrated by our many long-term working relationships, the frequent requests for repeat services, and the large number of referrals we receive.

Resources and Flexibility—Our corporate structure provides the diverse resources of a large multidisciplinary firm, while maintaining the flexibility and personal relationships of a small company.

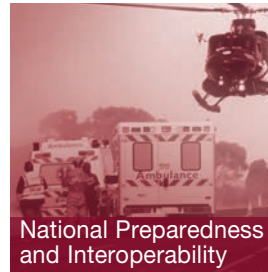

Engineering and Planning

Energy Efficiency and Sustainability

Financial and Economic Consulting

National Preparedness and Interoperability

Willdan has had two primary service objectives since our inception in 1964—ensuring the success of our clients and enhancing our surrounding communities. Working steadily toward these goals, we have earned a reputation for technical excellence, cost-effectiveness, and responsiveness in providing superior engineering and planning consulting services. In recent years Willdan has expanded its service offerings into several vital areas, including financial and economic analysis, homeland security, environmental remediation, and sustainability. We have crafted this set of integrated services to ensure that, in the face of our evolving environments—economic, natural, and built—Willdan can continue to extend the reach and resources of our clients.
