- Civil Plan Review
- Master Planning
- Program/Construction Management
- Structural Engineering
- Survey and Mapping
- Traffic Engineering
- Transportation Engineering
- Water Resources

Willdan has provided superior engineering and planning consulting services

for more than 40 years. During that time we have earned an outstanding reputation as problem solvers by successfully delivering comprehensive, yet tailored, solutions to meet the specific needs of municipalities, counties, and special districts, as well as state and federal agencies throughout California, the Southwest, and nationwide.

Combining an integrated approach with state-of-the-art technical resources, depth of staffing, and services that are both wide ranging, yet complementary, Willdan supports all phases of project development from concepts and financing through final design and construction. Throughout these phases our emphasis is on strong project management, cost effectiveness, timely performance, and consistent reciprocal communication—both with our clients and among our internal and external resources. Willdan is committed to ensuring that our clients benefit from the strength and experience of our entire organization. Our experts and engineering professionals are adept at communicating their practical knowledge and technical expertise across disciplines in pursuing the most practical and effective solution for each project.

Willdan has had two primary objectives since our inception in 1964—ensuring the success of our clients and enhancing our surrounding communities. Working steadily toward these goals we gained a notable reputation for technical excellence, cost effectiveness, and client responsiveness in providing superior engineering and planning consulting services. In recent years Willdan has expanded our service offerings into several vital areas including financial and economic analysis, homeland security, environmental remediation, and sustainability. We have crafted this set of integrated services so that, in the face of our evolving environment—whether economic, natural, or built—Willdan can continue to extend the reach and resources of our clients.

Willdan Engineering offers a full complement of professional engineering and planning consulting services that encompass city/county and special district engineering, municipal planning, plan checking, building and safety, program/construction management, public works inspection, disaster recovery, survey and mapping, geotechnical and earthquake engineering, and infrastructure design. Our infrastructure design capabilities are wide-ranging and include traffic and transportation, water resources, flood control and drainage, structures, and landscape architecture. Unique to Willdan is our understanding of public agency needs and issues. Willdan professionals often serve to extend our clients' staff in the capacity of city/county engineers and other public agency positions. Additionally, many provide the added value of having served in public agency management positions prior to joining Willdan. With this depth of experience, expertise, knowledge, and resources, Willdan offers comprehensive solutions that are timely, cost effective, and tailored to meet the needs of individual communities.

Willdan's broad array of planning, engineering, design, and construction management capabilities encompasses city/county and special district engineering, urban and regional planning, environmental planning, plan checking, building and safety, program/construction management, public works inspection, disaster recovery, and infrastructure design including structural, roads and highways, traffic and transportation, water and wastewater, flood control and drainage, survey and mapping, geotechnical and earthquake engineering, and landscape architecture. Other specialties include grant application assistance, National Pollutant Discharge Elimination System (NPDES) coordination and compliance, and American with Disabilities Act (ADA) analysis and compliance.

Our understanding of the needs and challenges facing public agencies is unmatched in the industry. Willdan's professionals often serve to extend our clients' staff as city/county engineers and other public agency positions ranging from full-time, in-house staffing to interim or part-time assistance. Additionally, a significant portion of our staff has served in public agency management positions prior to joining Willdan—an added value to our professional services. This wealth of expertise and resources has resulted in an in-depth understanding of the issues driving local governments. Regional and satellite offices are specifically networked and strategically located to offer local, focused service to the varied demographics of our public agency customers. Consequently, Willdan's ability to develop innovative yet practical solutions specifically adapted to the needs of individual communities remains unsurpassed.
