- Maintenance Contract Documentation and Administration

**Landscape Architecture.** Willdan assists public agencies in the design and master planning of parks and recreation facilities, as well as in the redevelopment of community-wide beautification plans. Project quality is achieved by successfully balancing design creativity with technical soundness.

Land use analysis, consensus planning, urban design, site design, landscape preservation, land management, water conservation, land reclamation, and rehabilitation are the designing factors applied by Willdan’s professional staff when developing landscape architecture projects.

**Quality Standards.** Landscape architecture professionals design environments for the human habitat. The quality of that design has an impact at home, at work, and at leisure, as well as in urban settings that

# Landscape Architecture Services Overview

**Willdan** has had two primary objectives since our inception in 1964—ensuring the success of our clients and enhancing our surrounding communities. Working steadily toward these goals we gained a notable reputation for technical excellence, cost effectiveness, and client responsiveness in providing superior engineering and planning consulting services. In recent years Willdan has expanded our service offerings into several vital areas including financial and economic analysis, homeland security, environmental remediation, and sustainability. We have crafted this set of integrated services so that, in the face of our evolving environment—whether economic, natural, or built—Willdan can continue to extend the reach and resources of our clients.

**Willdan Engineering** offers a full complement of professional engineering and planning consulting services that encompass city and special district engineering, municipal planning, plan checking, building and safety, program/construction management, public works inspection, disaster recovery, survey and mapping, geotechnical and earthquake engineering, and infrastructure design. Our infrastructure design capabilities are wide-ranging and include traffic and transportation, water resources, flood control and drainage, structures, and landscape architecture. Unique to Willdan is our understanding of public agency needs and issues. Willdan professionals often serve to extend our clients' staff in the capacity of city engineers and other public agency positions. Additionally, many provide the added value of having served in public agency management positions prior to joining Willdan. With this depth of experience, expertise, knowledge, and resources, Willdan offers comprehensive solutions that are timely, cost effective, and tailored to meet the needs of individual communities.

bind our communities. The quality of our standards goes beyond the traditional definitions of “on time and within budget.”

**Team Approach.** Willdan’s staff is experienced in identifying key elements and approaches to beautification and enhancement goals unique to each community.

Willdan’s landscape architects work with public agency staff and with other design and construction professionals to produce creative, financially viable, and sustainable projects.

**Customer Service: A Core Value.** While keeping abreast with modern technology and innovation, Willdan upholds the company’s

original 1964 core value—its strong emphasis on customer service. Willdan is committed to the quality and continuous progress of the project by ensuring the involvement of a firm’s principal from concept through design, construction, and management phases.

**Consistent Value in a Changing World.** As new demands emerge in an everchanging public arena, the needs of communities will remain at the heart of Willdan’s service commitment.
