

Network Infrastructure and Security

If your technology infrastructure requires updating or if you have network security concerns, Willdan Financial Services is ready to team with your technical and financial staff to develop the required solutions. Willdan Financial Services is a leader in providing services and support to public agencies. As a result, our information technology staff is experienced in assessing network solutions related to many types of public agency projects; including projects specific to finance and accounting, special district administration, utility rate studies, and fee studies. We are also proficient in the data retention and document storage requirements related to federal compliance reporting, including arbitrage rebate and disclosure reporting for bonded debt. Our technology specialists can work

Willdan Financial Services Provides Information Technology Assessment Services

- Network Infrastructure and Security Solutions
- Hardware and Software Solutions
- Document and Data Retention Solutions

with your staff to prioritize recommended improvements and determine the most effective use of the funds budgeted for network enhancements. Willdan Financial Services does not sell hardware or equipment; we provide services and solutions. Our network assessment services are centered on improving staff productivity, providing cost-effective recommendations, reducing user stress, and providing you with the confidence that your network is optimized and secure.

Willdan Financial Services is ready and available to assist with information technology infrastructure solutions.

Hardware and Software

If the information technology hardware your staff is utilizing is out of date, Willdan Financial Services is ready and available to assist your technical and financial staff with improvements. Our information technology specialists can help maximize the benefits from funds budgeted for new hardware, or provide recommended modifications to upgrade existing hardware.

Why is my network running so slow?

We can forecast the deployment of hardware necessary to meet the needs of your changing staff or evolving organizational structure, and assist in the development of information technology implementation plans. Additionally, if you are concerned that your software licensing may be non-compliant, the Willdan Financial Services information technology team can provide audit assistance for meeting software compliancy standards. Our approach includes an on-site visit to your location and an assessment of your needs based on departmental feedback, customer requests, and property-owner service requirements; all while maintaining a focus on improving staff productivity.

What is the most effective use of my budgeted funds for technology?

Documents and Data

If you are concerned that your document and data retention standards are not sufficient or do not comply with governmental regulations, Willdan Financial Services can provide an assessment of your existing storage procedures. If necessary, we can also assist in the implementation of improved document and data storage practices. Willdan Financial Services has over 20 years of experience storing and retaining special district, bonded debt, and property-related documents and data. The public agency services we provide also require us to be well versed in the document storage and retrieval procedures mandated by many governmental regulations. Our information technology team is experienced with implementing proven document and data backup procedures and can assist your technical and financial staff with similar cost-effective solutions to ensure that your documents and data are properly protected. Our solutions will improve required staff accessibility to the stored information while maintaining necessary security and confidentiality standards.

About Willdan

Willdan has had two primary objectives since our inception in 1964; ensuring the success of our clients and enhancing our surrounding communities. Working steadily toward these goals—primarily in engineering, planning, geotechnical, and building safety—we gained our notable reputation for technical excellence, cost effectiveness, and client responsiveness.

During the past decade, our nation has witnessed mounting fiscal and security concerns, as well as critical issues regarding both our man-made infrastructure and the natural environment. In response, Willdan has expanded our service offerings into several vital areas including:

- Financial and Economic Analysis
- Homeland Security
- Environmental Remediation
- Sustainability

We have crafted this set of integrated services so that, in the face of our evolving environment—whether economic, natural, or built—Willdan can continue to extend the reach and resources of our clients
