- Project Management Services

Willdan provides homeland security, public safety, and emergency management services that focus on integrating local resources and assets within state and federal systems, spanning our four mission areas—prevention, protection, response, and recovery. What differentiates Willdan is our staff’s uniquely credible and practical expertise as well as our ability to offer clients a one-stop shop to meet all of their public safety and homeland security needs. With extensive hands-on experience in local, state, and federal agencies, our outstanding professionals have served as incident commanders, emergency managers, first responders, and investigators. Willdan has worked closely with state and federal officials on all aspects of homeland security, public safety, and emergency management, and can provide our clients with the most effective means of meeting the challenges they face.

Willdan serves a wide variety of clients nationwide, ranging from municipalities, counties, and state and federal agencies to the private sector and non-profit organizations. Included among our clients are utilities, water companies, school districts, port authorities, police and fire departments, as well as transit and public health agencies. We are fortunate to be able to call upon our more than four decades of experience and our highly regarded engineering, planning, project management, financial analysis, and environmental expertise to enhance our homeland security services. With an unwavering commitment to providing our clients with innovative services, useful advice, and superior solutions as they face the latest emergency management and homeland security challenges, exceeding our clients’ expectations is always our primary goal.

Willdan has had two primary objectives since our inception in 1964—ensuring the success of our clients and enhancing our surrounding communities. Working steadily toward these goals we gained a notable reputation for technical excellence, cost effectiveness, and client responsiveness in providing superior engineering and planning consulting services. In recent years Willdan has expanded our service offerings into several vital areas including financial and economic analysis, homeland security, environmental remediation, and sustainability. We have crafted this set of integrated services so that, in the face of our evolving environment—whether economic, natural, or built—Willdan can continue to extend the reach and resources of our clients.

Willdan Homeland Solutions

specializes in a broad range of public safety and homeland security consulting services that focus on integrating local resources and assets within state and federal systems. Staffed with highly experienced and credible law enforcement, fire, and related public safety professionals, our primary clients are cities, counties, and related municipal service agencies such as utility and water companies. Additionally, we provide a variety of services to port and transportation authorities as well as tribal governments, schools, and large business enterprises with a need for homeland security-related services.

Planning

Willdan offers services to design, implement, review and evaluate government and business Emergency Operations and Hazards Mitigation Plans. Whether your Emergency Operations Plan (EOP) needs to be developed, updated, or evaluated, our professionals have the expertise to meet your needs. We will develop an EOP that is comprehensive and tailored for your specific agency responsibilities, is non-bureaucratic and easy to understand, and will never be a boilerplate template. All of our professionals have decades of practical experience and know the value of having realistic and useful EOPs.

Our team works closely with your key personnel from all agency departments to ensure that Emergency Operations and Hazards Mitigation Plans developed are developed that are consistent with current federal, state, and local laws and policies. Willdan professionals have developed Emergency Operations, Continuity and Hazards Mitigation Plans for: Municipal Governments, Special Districts, School Districts, and Private Business and Industry.

Training

Willdan offers a variety of practical training courses for all aspects of disaster, unusual occurrence, and emergency response. Our trainers all have over 20 years of actual experience in emergency preparedness and response at the local or state level, and are experts in the integration of local, state, and federal resources during response actions. Each of our courses can be tailored to meet individual state and local guidelines and the needs of different types of organizations such as school systems, transit agencies, or private business firms, and most have been approved for reimbursement by the U.S. Department of Homeland Security.

HSEEP-Compliant Exercises

Our exercises can be tailored for single or multi-agency involvement and are fully compliant with NIMS, the National Response Framework, and the Homeland Security Exercise and Evaluation Program. Projects and exercises include Weapons of Mass Destruction, Large Event Planning, Mass Casualty Transportation Disasters, Terrorism Incident Response, Natural Disaster Response and Recovery, and Civil Disorder Events.

Communications and Technology Solutions

Government agencies continue to face ongoing challenges that involve conflicting missions (operations issues), jurisdictional concerns (governance issues), and incompatible systems (technology issues).

Willdan's Communications and Technology Solutions team recognizes that no issue is more mission-critical to our clients than providing effective and reliable communications to first responders. Our team's mission is to ensure emergency responders can communicate by focusing on the communication needs and requirements of the first responder, in support of the incident mission and objectives. We build on the strong reputations of our consultants and their technical and operational expertise in the public sector—a reputation achieved through dedication to our clients' core mission objectives. Our team members bring significant consulting experience in local and regional radio communications related to emergency preparedness and response.

The Willdan team leverages the Willdan group of experts who not only specialize in communications, governance, and operations, but also provide our clients with program management services, financial analysis, and civil and geotechnical engineering, as well as training and exercise development and facilitation.
