

WILLDAN ENGINEERING

FIRE SERVICES

Willdan Fire Services, a division of Willdan Engineering, is the premier provider of Fire Plan Review and Inspection Services throughout the nation. In an effort to expand services, Willdan acquired Dennis Grubb & Associates (DGA) in 2023, founded by industry veteran Dennis Grubb in 2005. Willdan's associates provide high quality service using precise and consistent communication to meet client needs and expectations.

Willdan believes that success in delivering timely, efficient, and cost-effective results to clients is a team effort – made possible by the talent and dedication of experienced Willdan staff.

WILLDAN TEAM EXPERIENCE

At Willdan, we have assembled an exceptional team of professionals to serve all of your Fire Service needs. Our staff members represent the very best the industry has to offer to our clients.

All of our dedicated associates specialize in FIRE SAFETY and have the following qualifications:

- Over 30 years of direct fire prevention experience
- A college degree or higher
- Industry-recognized professional certifications
- Knowledge, skills, and expertise required to provide plan review and inspection services to municipalities

OUR EXCELLENCE IN FIRE PLAN REVIEW

The primary reason many choose Willdan is our outstanding service and experience in all areas of fire and life safety plan review and inspection.

Although municipalities are similar in organization, each one is unique in its operation and requirements for fire ordinances and codes. At Willdan, we understand that each jurisdiction is unique, and we tailor our many services to meet the needs of what is important to your jurisdiction.

The following strengths distinguish us from our competition:

- Full Service Firm
- Seamless Electronic Plan Review
- Quick Turnaround Times
- Customer Service

FIRE PLAN REVIEW AND INSPECTION SERVICES

PROJECTS AND CLIENTS

Willdan has the experience to review a wide variety of plan types. Some of the complex projects reviewed by Willdan personnel include:

Loma Linda University Medical Center

Great Wolf Lodge

Amazon Fulfillment Center

Toyota Arena

ASSISTING CITIES TO BUILD SAFER COMMUNITIES

The scope of regulations that affect the design and construction of buildings has become increasingly diverse and complex with new legislation. For fire departments to operate effectively, their consultants must be knowledgeable and well trained in interpreting, applying, and enforcing codes and standards.

Willdan ensures that our associates are current with the most recent adopted codes and standards in your jurisdiction to aid in your development process.

QUALITY ASSURANCE

A Senior Plan Reviewer and the Management Team will periodically conduct a quality control review for accuracy and thoroughness. Our plan review team collaborates with city staff, applicants, developers, and others to resolve code issues. This collaboration reduces the number of reviews and helps the projects move forward. All reviews past the third check are evaluated by the supervisor as a control point.

We hold monthly technical staff meetings to review new changes, interpretations, code applications, and any relevant ongoing issues, aiming to enhance quality and consistency.

THE WILLDAN PROCESS FOR SUCCESS

Through our experience providing contract services to government agencies across the country, Willdan follows these essential concepts to effectively fulfill city or county requirements:

- Timely, efficient, and cost-effective response to each agency's needs
- A reputation for quality performance and integrity to successfully administer all code aspects
- Establishment of and adherence to expectations and performance accountability
- Professional representation on behalf of the client agency to maintain good public relations
- Administrative and management ability of high caliber to identify issues and resolve them in a timely and sure manner

ABOUT WILLDAN
